Subject: RE: Question about AltEn and Effects-Driven Analysis

That's a good question and honestly I don't remember. It was mostly EPA folks on the call (besides the two UNL researchers) so I wouldn't be surprised if it was proposed by one of our folks. Elin was also on the call so maybe she remembers if you want to try her

Subject: Question about AltEn and Effects-Driven Analysis

Hi Seth,

One thing I am curious about – how did the subject of effects-driven analysis come up in relation to the AltEn problems? Was that proposed by the other folks on your recent call, or was that something that came from the EPA side?

Thanks,
Denise
